

Enhancing Research. Accelerating Progress.

Why Choose **EBSCO**?

For decades, EBSCO Information Services has been a leader in providing world-class research solutions to medical and life sciences professionals.

Our commitment to quality, reliability, and innovation makes us the premier choice for institutions and individuals seeking authoritative, evidence-based content.

UNPARALLELED REPUTATION

Trusted by top universities, hospitals, and research institutions worldwide.

COMPREHENSIVE COVERAGE

Access to a vast collection of peer-reviewed journals, conference proceeding and reports on breakthroughs in therapeutic areas, and evidence-based secondary research.

SUBJECT MATTER EXPERTS AND TECHNOLOGY

We leverage AI efficiency and expert subject-matter validation to optimize our search technology to deliver the most accurate and relevant information.

The Tools to Stay Ahead

Our research databases cover a wide range of subjects with diverse content such as peer-reviewed journals, trade publications, and conference papers.

Biotechnology Source

The largest collection of full-text journals (over 7,500) indexed in MEDLINE, EMBASE and BIOSIS – designed specifically for life sciences research.

DynaMed

A clinical-decision support tool to ensure evidence-based decision-making, and support of regulatory compliance by providing rigorously reviewed, up-to-date content. This database enhances the speed of bringing new treatments to market while ensuring high-quality, reliable data for successful clinical outcomes.

MEDLINE Ultimate

The largest full-text companion to the MEDLINE index, providing medical professionals and researchers unparalleled access to 2,500 active full-text journals, including numerous top biomedical publications.

Partner with us for critical insights and data to help you:

- Stay up to date on breakthroughs in therapeutic areas
- Track emerging trends
- Read comparative studies
- Learn about regulatory changes, safety studies, drug efficacy, and more
- Assess opportunities for business growth
- Inform study data integrity and feasibility
