Academic Solutions
from EBSCO

Take our **interactive tour** to learn how EBSCO can bring together all the resources of your library to **work in harmony**.

Table of Contents

Library Management

EBSCO collaborates with libraries to develop a **library services platform** that supports an **open future**.

Library Management

FOLIO is an open-source library services platform that includes core library management functionality and is built on a modern architecture to ensure continuous innovation. It supports the integration of applications from third-party providers and provides improved features and workflows versus legacy systems. The new model for building FOLIO is based on librarian input and collaboration.

EBSCO FOLIO Services

EBSCO offers best-in-class implementation, hosting and support services for libraries who want to use the open-source platform but don't have the resources to do it on their own.

Current, Scholarly Resources

With the prevalence of non-vetted internet content, now it is more important than ever for researchers to have access to **reliable scholarly, peer-reviewed information**.

Current, Scholarly Resources

The Ultimate databases provide content unavailable in other resources and offer unparalleled international journals that give researchers a global perspective.

NEW from EBSCO

Mosaic is a new book ordering platform, built from the ground up in partnership with libraries and publishers, that streamlines and modernizes the book acquisition process.

LitBase is a new global literature database with critical primary and secondary sources to support research of the most studied authors and their works.

FinancialFit offers short personal finance lessons, videos and interactive tools to help students and faculty make informed decisions and achieve their financial goals.
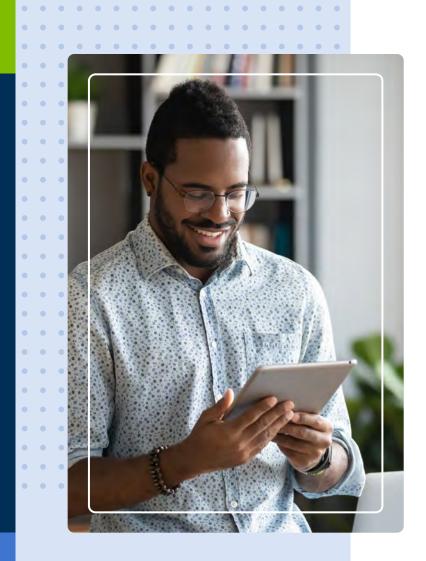

Petroleum Source povides access to the largest collection of full-text journals covering oil, gas and petroleum products.

Coming Soon: Music Index Archive provides indexing and abstracts for 480 journals and magazines in the Music Index covering classical to popular music.

Collection Management

Your time — like your collection — is valuable. Maximize both with tools that streamline your workflow whether you are selecting databases, journals and e-books or managing library systems.

EBSCO

Collection Management

EBSCO Journal and e-Package Services partners with libraries to streamline workflows, optimize e-Journal usage, and enhance overall resource management. EBSCONET simplifies each step of the subscription management process —title selection, ordering, e-access activation, claims, renewals, and evaluation—all within a single, intuitive online platform.

EBSCOhost Collection Manager (ECM) allows users to order, build and manage EBSCO eBooks and Flipster digital magazine collections and provides access to MARC records, EBSCO eBook Manager, DRM-free e-books and usage reporting.

GOBI Library Solutions offers more than 22.4 million print books and e-books and the largest selection of DRM-free e-books to academic, research and special libraries worldwide.
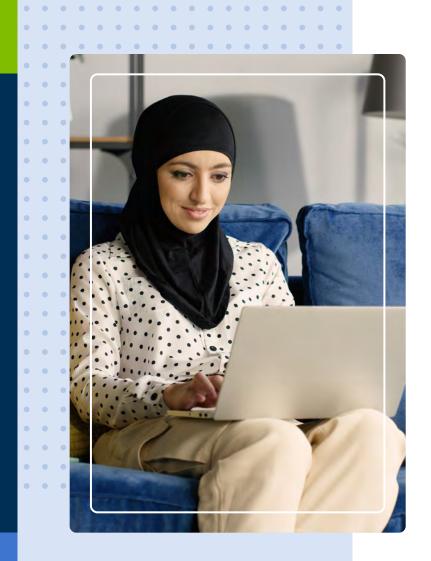

Mosaic brings together the strengths of GOBI and EBSCOhost Collection Manager (ECM) to create a modern, accessible platform designed for efficiency and ease of use. It simplifies library acquisitions by offering streamlined workflows, guaranteed pricing, and rapid fulfillment.

Library Technology & Discovery

> **Advanced technology solutions** ensure that students, researchers and faculty can access your library's materials easily, whether they are on campus or online.

EBSCO

Library Technology & Discovery

EBSCO Discovery Service (EDS) is an all-inclusive search solution — including a mobile app — with sophisticated functionality to anticipate user intent and to connect researchers to the most relevant scholarly information.

OpenAthens is an advanced access management system that is based on SAML standards to allow institutions to keep single sign-on logins and user data more secure.
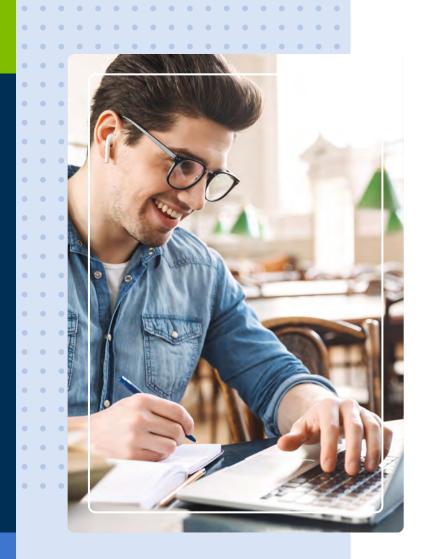

Panorama is a modern library analytics platform combining different library and campus data sets to enable insights that were not possible until now. The platform features dynamic, visual dashboards to manipulate and display data about the library and the users it serves.

Stacks is a turnkey content management system designed specifically for libraries, enabling them to build and manage a responsive and modern library website with ease.

Full Text Finder (FTF) is a next-generation knowledge base, holdings management tool, publication finder and link resolver that integrates with EDS.

BiblioGraph enhances the visibility of your library's catalog on the open web, allowing users to find, explore and access a variety of catalog content from wherever they start their search.
