

Streamline access. Save researchers time. Stop wasted effort.

Meet the SaaS Suite for Research. Designed to bring together the best in medical content, technology and user experience to transform the way research gets done.

Stacks

Create a scalable and customizable single-point portal to make research more streamlined and intuitive.

- ✓ Increase usage of content
- ✓ Cultivate collaboration within research teams
- ✓ Curate specific research experiences via multi-domain portals for individual teams and departments

EBSCO Discovery Service Health

Utilize an advanced search and discovery platform to surface the most relevant information to researchers – from both paid and internal resources.

- ✓ Surface direct access to full-text articles
- ✓ Maximize paid and internal resources
- ✓ Help connect researchers to exactly what they are looking for with features and functionality such as MeSH Headings, designed to enhance search

OpenAthens

Reduce frustration by offering single sign-on technology to provide secure access to all your personalized electronic content.

- ✓ Allow the end-user to move from resource to resource without re-entering their credentials
- ✓ Provide researchers with seamless access to content -- anytime, anywhere, from any device
- ✓ Utilize usage and statistics to evaluate resources
